OWNER

Homewood Suites

PROJECT DESCRIPTION

BillerReinhart Structural Group, Inc. performed Threshold Inspector duties as per Chapters 471 and 553 of the Florida Statutes for the 98,000 square foot seven-story hotel building. The structure consists of cast-in-place concrete foundations and floor slab on grade, reinforced concrete masonry unit walls, and post-tensioned reinforced concrete floor and roof slabs. BillerReinhart reviewed structural drawings, specifications, and submittals, performed site visits to observe project construction, and prepared reports documenting the work to the building code official having jurisdiction over the project.
