PROJECT DESCRIPTION

BillerReinhart Structural Group, Inc. performed Threshold Inspector duties as per Chapters 471 and 553 of the Florida Statutes for the 165,000-square-foot three-story grocery store facility with elevated parking on the second and third levels. The structure consists of cast-in-place concrete foundations and floor slab on grade and precast concrete columns, beams, wall panels and floor elements. BillerReinhart reviewed structural drawings, specifications, and submittals, performed site visits to observe project construction, and prepared reports documenting the work to the building code official having jurisdiction over the project.
